Keys to using pEEG
Examples ++ (improving pattern
recognition)
Feedback, certificates
& Close

Booking via bookcpd.com £95 Course Director: Dr Tom Peck

Revalidation
FOR ANAESTHETISTS

Feedback from last course...

This day punched well above its weight. I can't remember the last time I came away from a CPD event with such abundant new understanding. The academic standard was excellent, grounded in an honest real-life setting. Thank you to all the faculty for such a fab day.

Fantastic course! Very useful content which will inform my daily practice. Pitched at the right level, with difficult topics explained in a clear and concise manner. A huge thank you to all members of the faculty and the time they spent preparing for this course.

I thought this course was brilliant. An excellent balance between science and practicalities. Thank you all.

Such a great complimentary set of presentations. Each layering up the the previous one so I feel I have left with a much better understanding of how I can adapt my TIVA and interpret the pEEG with more confidence. A really positive day.

A fantastic day of learning covering all aspects of TIVA and pEEG. Has definitely improved my knowledge, understanding and pattern recognition. I will be a safer TIVA anaesthetist as a result. Also fantastic venue and food and great value for money for a full day of CPD. Thank you.
